

Building the Future of Business. Together.

Our mission is simple:

To empower every organization with enterprise capabilities through the principles of

**Business Enablement,
Business Inclusion,
Financial Inclusion,
Trust by Design,
Sustainable Growth.**

Every great business begins with ambition. Every ambition deserves more than software—it deserves intelligence, clarity, and a trusted partner committed to helping it grow.

At **SOSME**, we believe the future of business will be shaped by intelligence, trust, and inclusion.

That is why we created **SOSME OS**—the Intelligent Enterprise Operating System that unifies operations, finance, people, commerce, governance, compliance, and digital services within a single connected platform powered by **Yara Intelligence**.

This **Customer Engagement Package** establishes the commercial and legal foundation for your organization's subscription to **SOSME OS** and marks the beginning of a trusted partnership built on transparency, innovation, and shared success.

"We believe intelligence, opportunity, and growth should be accessible to every business — not just the largest enterprises, but every entrepreneur with the ambition to build something extraordinary."

Dr. Wissam Younes
Founder, SOSME
