

Yara AI Capabilities

Yara AI is SOSME's enterprise AI assistant, designed to augment—not replace—people.

Yara AI is SOSME's enterprise AI assistant that helps organizations understand, automate, analyze, validate, and optimize business operations through secure, governed, and human-centered artificial intelligence.

Integrated across the SOSME Business Operating System, Yara helps organizations automate routine work, analyze business information, enforce governance, and support better operational decisions while maintaining transparency, security, and human oversight.

Yara continuously evolves through platform updates, enabling organizations to improve productivity while maintaining control over business-critical processes.

Core Capabilities

Understand

Yara understands structured and unstructured business information, including documents, transactions, contracts, invoices, emails, reports, and operational records.

Read

Yara performs intelligent OCR and document recognition to extract information from invoices, receipts, purchase orders, contracts, and supporting documentation.

Analyze

Yara analyzes operational, financial, commercial, and organizational information to identify trends, anomalies, risks, and business opportunities.

Recommend

Yara provides context-aware recommendations to help users make informed operational and financial decisions based on available business data and governance rules.

Generate

Yara assists users by generating reports, summaries, emails, dashboards, policies, business documentation, and other productivity content.

Validate

Yara validates transactions, documents, workflows, and business activities against configurable governance rules, approval matrices, and organizational policies.

Automate

Yara automates repetitive administrative activities, workflow routing, approvals, notifications, reminders, and operational tasks throughout the SOSME Platform.

Assist

Yara provides conversational assistance across SOSME modules, helping users navigate the platform, locate information, understand processes, and complete tasks efficiently.

Learn

Where enabled, Yara improves recommendations using organizational context, historical interactions, and customer-specific configurations while respecting privacy and governance requirements.

Integrate

Yara supports interaction with connected systems, APIs, and approved third-party services to provide a unified business experience across the enterprise ecosystem.

Human Oversight

Yara is designed to support human decision-making.

Important business decisions remain the responsibility of authorized users.

Organizations retain full control over:

- ◆ approval workflows;

- ◆ financial authorizations;
- ◆ governance policies;
- ◆ security permissions;
- ◆ AI configuration.

Privacy & Security

Yara operates within the SOSME security and privacy framework.

Its operation is governed by:

- ◆ Responsible AI Policy
- ◆ AI Transparency Statement
- ◆ Privacy Policy
- ◆ Security Statement
- ◆ Data Residency & Hosting Statement

Availability

The capabilities available to each customer depend on:

- ◆ subscribed SOSME products;
- ◆ Yara AI plan;
- ◆ enabled features;
- ◆ organizational configuration;
- ◆ applicable regulatory requirements.
